

EyeRecorder.OnApplicationQuit

EyeRecorder.OnDisable

EyeRecorder.Release

```
graph LR; A[EyeRecorder.OnApplicationQuit] --> C[EyeRecorder.Release]; B[EyeRecorder.OnDisable] --> C;
```

The diagram illustrates a flow where two events, `EyeRecorder.OnApplicationQuit` and `EyeRecorder.OnDisable`, both trigger the `EyeRecorder.Release` method. The source boxes are white with black borders, while the destination box is gray with a black border. Blue arrows indicate the direction of the flow from left to right.
